(54) LUBRICATING OIL FOR BEARING

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a lubricating oil for bearing having a low viscosity, and excellent in heat resistance, lubricating ability and low-temperature fluidity.

SOLUTION: The lubrication oil contains an aliphatic monocarboxylic acid ester obtained by esterifying a 7-16C aliphatic saturated monocarboxylic acid with an 8-16C aliphatic saturated monohydric alcohol.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
